

PRODUCT INFORMATION

SUNOCO Gearol B2

- Description** The ideal gear compound for all open gears of various types through high pressure lubrication in the smallest corners. GEAROL B2 is an outstanding solvent cut-back, soft film compound containing a volatile agent.
- Application** GEAROL B2 is used primarily for the lubrication of open gears, draglines of cranes, excavators and earthmoving machines, steel wires of elevators and other slow moving heavy chains and cables. In general, for all applications where a gear spray lubrication is required.
- Specifications** This product is applied by mere spraying, made possible by removing the protecting capsule and pushing the spray button.
- Properties**
- For cables and steel wire.
 - Excellent lubricating properties.
 - Protects against wear and corrosion.
 - Water resistant.
 - Contains Molybdenum disulfide.
 - Extreme pressure (EP) additives.

Typical analysis

Density at 20 °C	0.667
Vapour pressure / bar	4
Colour	Brown/black
Odour	Oil
Propulsion	Propane/butane
